

FRUNCO RUIZ

FULL-STACK DEVELOPER & AI PRODUCT BUILDER

Los Angeles, California, USA • azulrio906top@gmail.com • my-portfolio-seven-one.vercel.app • github.com/joanacristovao8511-debug

PROFESSIONAL SUMMARY

Full-stack developer and product builder creating polished web applications, business platforms and AI-powered experiences. Builds end-to-end systems spanning frontend architecture, backend services, APIs, databases, authentication, AI/LLM integrations and product-focused UX, with an emphasis on usability, performance, maintainability and real business value.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Zustand, HTML5, CSS3

Backend: Node.js, Express, REST APIs, Authentication, NextAuth

Database: PostgreSQL, SQLite, MongoDB, Prisma, Redis

AI & Automation: Generative AI, RAG, AI Agents, AI Integration, AI Assistants, OpenAI, LLM Integration, AI Automation

DevOps: Git, GitHub, Docker, Vitest

PROFESSIONAL EXPERIENCE

Full-Stack Developer & AI Product Engineer | May 2023 — Present

Independent / Freelance · Remote

Lead end-to-end development of AI-powered applications and modern web platforms across frontend architecture, backend services, API design, database systems, authentication and AI/LLM integrations. Build scalable product foundations, intelligent workflows and polished user experiences from prototype to production.

Senior Full-Stack Developer | Jan 2021 — Apr 2022

Product Development · Remote

Led development of modern web platforms and internal business applications across frontend and backend systems. Built reusable component architectures, REST APIs, database-driven workflows, authentication systems and responsive interfaces while working closely with product and design requirements.

Frontend Developer | Jan 2019 — Dec 2020

Software Development · Remote

Developed production-grade responsive interfaces using modern JavaScript frameworks and component-based architectures. Focused on reusable UI systems, performance, accessibility, responsive design and translating product requirements into polished user experiences.

SELECTED PROJECTS

AI Workflow Automation | *AI, Automation, Node.js, APIs, TypeScript*

Automation system combining AI capabilities with structured business workflows to reduce repetitive manual tasks.

Retrieval-Augmented Generation | *Next.js, React, TypeScript, Tailwind CSS, RAG*

Production-ready RAG system focused on grounding AI responses with relevant source context and a production-minded architecture.

Developer Portfolio CMS | *Next.js, Prisma, PostgreSQL, OpenAI, Vercel*

Content-driven developer portfolio with project management, skills, experience and an authenticated admin dashboard.

Business Management Platform | *Next.js, TailwindCSS, Vercel*

Full-stack business application for customers, workflows, records and day-to-day operations.

EDUCATION

Vietnam National University, Hanoi | Bachelor's degree in Computer Science

WORKING APPROACH

Business first. Understand the goal before choosing the technology.

Clean engineering. Build software that is reliable, maintainable and ready to grow.

Long-term thinking. Create systems that continue working after launch.

CURRENT FOCUS

AI agent architectures, Retrieval-Augmented Generation (RAG), LLM application design, cloud infrastructure and scalable full-stack systems.

Currently learning: advanced AI workflows, agent orchestration, system design and distributed applications.
