PROFESSIONAL SUMMARY

I am a Full-Stack Developer and product builder focused on creating modern, production-ready applications. I have ability of combine frontend engineering, backend systems, databases, and AI integrations to deliver complete digital products.

Core Technologies

Frontend: React, Next.js, TypeScript, Tailwind CSS

Backend: Node.js, Express, REST APIs, Authentication, NextAuth

Database: PostgreSQL, MongoDB, Prisma ORM, Neon

AI & Automation: Generative AI, RAG, AI Agents, AI Integration, AI Assistants, OpenAI, LLM Integration, AI Automation

DevOps: Git, GitHub, Docker, Vitest, Vercel, Cloudflare, AWS

PROFESSIONAL EXPERIENCE

Full-Stack Developer & AI Product Engineer | *May 2023 — Present*

Independent / Freelance • Remote

I lead end-to-end development of AI-powered applications and modern web platforms across frontend architecture, backend services, API design, database systems, authentication and AI/LLM integrations. I build scalable product foundations, intelligent workflows and polished user experiences from prototype to production.

Senior Full-Stack Developer | *Jan 2021 — Apr 2022*

Product Development • Remote

I led development of modern web platforms and internal business applications across frontend and backend systems. Also built reusable component architectures, REST APIs, database-driven workflows, authentication systems and responsive interfaces while working closely with product and design requirements.

Frontend Developer | *Jan 2019 — Dec 2020*

Software Development • Remote

I developed production-grade responsive interfaces using modern JavaScript frameworks and component-based architectures. Focused on reusable UI systems, performance, accessibility, responsive design and translating product requirements into polished user experiences.

SELECTED PROJECTS

AI Workflow Automation | *AI, Automation, Node.js, APIs, TypeScript*

Automation system combining AI capabilities with structured business workflows to reduce repetitive manual tasks.

<https://nodify.app/>

Retrieval-Augmented Generation | *Next.js, React, TypeScript, Tailwind CSS, RAG*

Production-ready RAG system focused on grounding AI responses with relevant source context and a production-minded architecture.

<https://rag-app.bhaveshg.dev>

Business Management Platform | *Next.js, TailwindCSS, Vercel*

Full-stack business application for customers, workflows, records and day-to-day operations.

<https://nellavio.com>

SaaS Analytic Dashboard | *React, Next.js, TypeScript, Tailwind CSS*

Responsive analytic dashboard for business performance, users, revenue and operational metrics.

<https://demo.sellf.app>

EDUCATION

University of Nebraska-Omaha, Nebraska | Bachelor's degree in Computer Science

Services

- Full-stack web application development
- AI feature integration
- SaaS platforms and dashboards
- Database-driven applications
- API development and integration

Development attitude

I manufacture applications that are client-oriented, production-ready, and designed to meet real business needs.

Not only build best code but also satisfy clients' requirements and help to make business keep forward competitively.

- Business first — understand the goal before choosing the technology.
- Clean engineering — build software that is reliable, maintainable and ready to grow.
- Long-term thinking — create systems that continue working after launch.
